PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building and maintaining production web systems for education, government, and commercial clients in Indonesia. Strong background in Laravel/PHP backend architecture, REST API design, relational databases, and third-party integrations, with end-to-end ownership from requirements through deployment. Comfortable working independently or within a team on business-critical systems.

TECHNICAL SKILLS

- Backend & API: PHP, Laravel, REST APIs, Sanctum, JWT, RBAC (Spatie Permission), Service Layer, Repository Pattern, API Versioning
- Frontend: JavaScript, React, Next.js, TypeScript, Tailwind CSS, Blade, HTML, CSS
- Database: MySQL, Eloquent ORM, Query Optimization, Caching
- DevOps & Infrastructure: Docker, Kubernetes (deployment manifests), Nginx, GitHub Actions, Linux/Ubuntu VPS, Cloudflare, Git
- Testing & Quality: PHPUnit, Playwright, PHPStan, Laravel Pint, Postman
- Integrations: Midtrans Payment Gateway, WhatsApp Cloud API, Claude API, Fingerspot Biometric API

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2024 – Jun 2026

SD Muhammadiyah 3 Samarinda · Part-time, Recurring Contract · Samarinda, Indonesia

- Designed and maintained a production school-management platform (ProductSchool) serving an active school with 1,000+ students, covering academic records, billing, and attendance workflows.
- Built and versioned 190+ RESTful API endpoints backed by a service-layer architecture with 130+ Eloquent models and 111 domain services.
- Implemented role-based access control (RBAC) and authentication/authorization across the platform to enforce data scoping by user role.
- Developed a headless architecture with a Laravel REST API backend and a React/Next.js frontend, replacing an earlier monolithic Blade application.
- Integrated Claude API for AI-assisted report card narrative generation, and WhatsApp Cloud API for automated payment and attendance notifications.
- Automated monthly billing workflows using Laravel Queue (24 background jobs) integrated with the Midtrans payment gateway.
- Established backend quality tooling: 1,036 PHPUnit tests, Playwright E2E scenarios, and PHPStan static analysis with zero outstanding errors.
- Prepared Kubernetes deployment manifests (Kustomize base + overlays, autoscaling, monitoring) alongside the existing Docker/Nginx/GitHub Actions deployment pipeline.

Full-Stack Developer Intern

Jul 2025 – Oct 2025

CV Beesoft Research & Technology (Britech) · Samarinda, Indonesia

- Built a membership-management system for a regional organization, including a relational database schema and a QR-code-based attendance system.
- Developed a geographic visualization feature displaying member distribution across a hierarchical regional structure (province to village level).
- Developed an information system for a vocational training center covering participant enrollment, class scheduling, certificate management, and an analytics dashboard.

Backend Developer — Freelance

Jul 2024 – Dec 2024

Utama Web — Client: Karta Spa · Samarinda, Indonesia

- Designed a multi-tenant Laravel backend for spa and F&B operations using the Repository Pattern, supporting multiple branches.
- Built a real-time inventory system with recipe-based stock deduction logic tied to each transaction.
- Integrated a Fingerspot biometric attendance device with an automated payroll calculation workflow.

Software Engineer — Separate Contract, Parallel

Nov 2024 – Dec 2024

Bappeda — East Kalimantan Provincial Government · Samarinda, Indonesia

- Developed an official government web portal using Laravel, including integration with a legacy database.
- Led a historical data migration process designed to preserve full data integrity from the legacy system.

- Built CMS-driven content workflows for civil servant profiles, resource directories, and public survey forms.

Full-Stack Developer — Freelance

May 2023 – Jul 2023

[Koetai Mahkota Soundline](#) · Samarinda, Indonesia

- Built an event management and ticketing platform using Laravel, including a Midtrans-integrated checkout flow, within a two-month delivery timeline.
- Iterated on the checkout UX based on client feedback to reduce transaction drop-off.

Note: roles during November–December 2024 (SD Muhammadiyah 3, Bappeda) were carried out in parallel as separate, independent contract/freelance engagements, not duplicate entries.

EDUCATION

Bachelor of Applied Science in Computer Engineering (S.Tr.Kom.) — Software Engineering Technology2022 – Aug 2026

[Politeknik Pertanian Negeri Samarinda](#) · GPA: 3.46 / 4.00

Diploma — Software Engineering

2019 – 2022

[SMK TI Airlangga Samarinda](#)

LANGUAGES

- Indonesian — Native
- English — Working Proficiency

AVAILABILITY

- Graduated August 2026 (Yudisium/degree conferral) — available for full-time work immediately. Open to remote roles and relocation.
