PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience designing, developing, and deploying scalable software solutions for education, government, and commercial organizations. Experienced across the software development lifecycle from system architecture and backend development to cloud deployment and performance optimization. Passionate about building secure, maintainable, and high-performance applications that solve real business problems.

KEY ACHIEVEMENTS

- ▶ Reduced manual administrative workload by 70% through an automated school billing system built with Laravel 10 Task Scheduler and Midtrans Payment Gateway, achieving approximately 100% processing accuracy.
- ▶ Achieved sub-1-second page load time through N+1 query resolution, strategic API caching, and database indexing across a school management platform serving 1,000+ students.
- ▶ Re-architected a monolithic Laravel Blade system to a headless Next.js 14 + Laravel 10 API stack — resulting in 70%+ improvement in page load time, a 90+ Lighthouse Score, and 99.9% uptime on Cloudflare edge infrastructure.
- ▶ Generated 4,471 organic search impressions and 167 clicks within 3 months post-launch, with a 3.5% CTR and average position 5.9, through structured SEO implementation.
- ▶ Increased online ticket sales by 45% through UX-optimized checkout flow redesign on an event and ticketing platform.
- ▶ Achieved Security Rating Grade A+ on two independent production environments through Nginx hardening, Cloudflare WAF, Content Security Policy headers, and SSL/TLS optimization.
- ▶ Maintained 99.5% operational reliability on a geofencing-based attendance system deployed for 1,000+ students using Google Earth KML data.
- ▶ Maintained 99% data accuracy across a multi-tenant Spa and F&B management system through multi-layer validation and automated stock reconciliation.
- ▶ Delivered a government web portal (Bappeda East Kalimantan Province) fully on time and within budget — now serving 3,000+ monthly visitors with stable performance since launch.

PROFESSIONAL EXPERIENCE

Software Engineer

SD Muhammadiyah 3 Samarinda | November 2023 – February 2025

Samarinda, Indonesia

- ▶ Led full re-architecture of school management system from monolithic Laravel 10 Blade (v1) to headless Next.js 14 + Laravel 10 REST API stack (v2), reducing page load from 3–5 seconds to under 1 second — a 70%+ improvement.
- ▶ Built JWT authentication system using HTTP-only cookies with granular RBAC for 5+ user roles via Spatie Laravel Permission, serving 1,000+ students and parents.
- ▶ Automated monthly school billing using Laravel Task Scheduler — auto-generated Virtual Account and QR-code invoices via Midtrans, reducing admin workload by 70% with ~100% processing accuracy.
- ▶ Integrated Meta WhatsApp Business API for real-time payment notifications, achieving 70%+ parent adoption of digital payment within the first month of launch.
- ▶ Deployed geofencing attendance system using Google Earth KML data, achieving 99.5% operational reliability across the full operational period.
- ▶ Optimized application performance via API caching, N+1 query resolution, and database indexing — achieving 40% faster page load and Lighthouse Score 90+ across all categories.
- ▶ Managed full DevOps lifecycle: Ubuntu VPS, Nginx, Cloudflare CDN and WAF, GitHub Actions CI/CD, and SSL/TLS hardening — achieving Security Rating Grade A+ and 99.9% uptime.
- ▶ Implemented SEO architecture (Schema.org, SSG, ISR, sitemap, Open Graph) generating 4,471 organic impressions, 167 clicks, 3.5% CTR within 3 months post-launch.

- ▶ Mentored junior developers on security practices, code review standards, SOLID principles, and architectural design patterns.

Backend Solution Architect (Freelance)

Karta Spa — Spa and F&B Management System | June 2024 – November 2024 Samarinda, Indonesia

- ▶ Designed scalable multi-tenant backend for Spa and F&B operations using Laravel 10 with Repository Pattern and SOLID principles, supporting multi-branch operations.
- ▶ Built real-time inventory management system with automated stock calculation, recipe-based ingredient deduction per transaction, and low-stock alert notifications.
- ▶ Implemented RBAC for 6 distinct user roles (admin, manager, cashier, GRO, kitchen staff, HRD) using Spatie Laravel Permission, with role-specific dashboard views.
- ▶ Integrated Fingerprint biometric HR system with automated payroll calculation module.
- ▶ Generated comprehensive daily and monthly financial reports, achieving 99% data accuracy through multi-layer validation and deduplication.

Software Engineer (Contract)

Bappeda — East Kalimantan Provincial Government | December 2023 – January 2024 Samarinda, Indonesia

- ▶ Led technical development of an official government web portal using Laravel 10, including complex legacy database integration and zero-loss historical data migration.
- ▶ Implemented multi-layer authorization system and a dynamic CMS covering civil servant profiles, resource directories, calendar-based agendas, and a Community Satisfaction Survey (SKM) module with Excel export.
- ▶ Designed fully dynamic multilingual content delivery system — no hardcoded translations — enabling content internationalization without developer intervention.
- ▶ Applied Nginx security hardening including security headers, CORS policies, and SSL/TLS optimization, achieving Security Rating Grade A+. Delivered on time and within budget.
- ▶ Platform currently serves 180 daily visitors and 3,000 monthly visitors with stable performance since launch.

Software Engineer (Freelance)

Koetai Mahkota Soundline — Event and Ticketing Platform | July 2023 – August 2023 Samarinda, Indonesia

- ▶ Designed and built a complete event management and ticket sales platform using Laravel 10, delivered within a 2-month timeline.
- ▶ Integrated Midtrans Payment Gateway with secure transaction processing, payment status automation, and admin dashboard with Excel export.
- ▶ Optimized checkout flow through UX improvements, resulting in a 45% increase in online ticket sales. Delivered ahead of deadline with zero critical bugs in production.

TECHNICAL SKILLS

- ▶ Backend: Laravel, PHP, REST API
- ▶ Frontend: Next.js, React, TypeScript
- ▶ Database: MySQL, PostgreSQL
- ▶ DevOps: Docker, Linux, Git

EDUCATION

Bachelor of Applied Science (D4) — Software Engineering

Politeknik Negeri Pertanian Samarinda

2022 – 2026

Graduated: 2026

Diploma — Software Engineering

SMK TI Airlangga Samarinda

2019 – 2022

Formal foundation: HTML, CSS, PHP, JavaScript, MySQL
